# UK SAILMAKERS

## Matrix Flasher Proposal For:

### Stan Folz

Boat: CATALINA 320

I: 43.57 FT J: 12.33 FT SPL: 12.33 FT

Sail Area: 800.24 sq FT

Material(s): .75 oz. Challenge

The Flasher is the one sail you can use that will make your boat much more lively and fun. The generic name for these sails is the asymmetrical pole-less cruising spinnaker. At UK Sailmakers, we call it the Flasher because it makes downwind sailing fast and fun. Not needing a spinnaker pole, the Flasher is the perfect sail for shorthanded cruising crews. The Flasher combines the ease of handling of a genoa with the pulling power of a spinnaker. The Matrix Flasher is designed for loads created on cruising boats over 45 feet. Its full radial construction is the strongest way to make a spinnaker. Each individual panel is shaped on all its sides to ensure a smoothly shaped sail. Bigger boats need all the strength of this panel layout.

## Matrix Flasher
